Horizon Europe Call Topic

(Title or topic ID)

HORIZON-CL4-2027-04-DIGITAL-EMERGING-11: EU Frontier AI Initiative: Developing frontier AI solutions that are safe and computationally efficient within Apply AI

Description of your expertise / the expertise you are looking for

(up to 1000 characters)

Tyche Institute offers to join a consortium as its evaluation partner, separate from the model developers. We can lead a safety-evaluation task or work package. Our method: test plans and KPIs fixed and timestamped before each run; open test corpora that include negative cases; replication of every result in a second environment; and a public, versioned evidence package for each finding. Related work: a study of machine unlearning whose protocol was frozen and timestamped before the run; open conformance verifiers and negative test sets for digital signatures and trust lists; and co-authorship of individual IETF Internet-Drafts on verifiable evidence of AI agent actions. We do not seek to coordinate. We are looking for a consortium that needs a small, rigorous evaluation partner.

Keywords describing your expertise / the expertise you are looking for

(up to 10 key words)

AI safety evaluation; AI agents; evaluation protocols; negative test cases; test corpora; reproducibility; KPI measurement; verifiable evidence; AI accountability; standardisation
